

# CARGO

**NEW**  
PRODUCT  
**2024**

## /Description

Cargo is a trolley for transporting and handling of large format slabs, facilitating their sliding also on uneven floors. It is equipped with a vibration-absorption system and it can be combined with Battipav large slab devices.

## /Equipped with

- Vibration-absorption system
- Safety hook
- Wooden supports
- Pivoting wheels with brake

## /Compatible with

- Mini Multi Bench
- Multi Bench
- Agile family
- Compact family
- Lampo Cut

## /Also buy with

- Agile family
- Compact family
- Mini Multi Bench
- Multi Bench
- Lampo Cut
- Suction cup

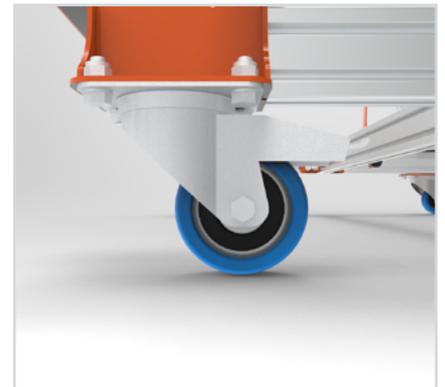

### FAST ASSEMBLY

The structure is in aluminium to get rigidity. Section is 30x30mm, specifically designed for a perfect balance between large format tile and high effective material resistance.

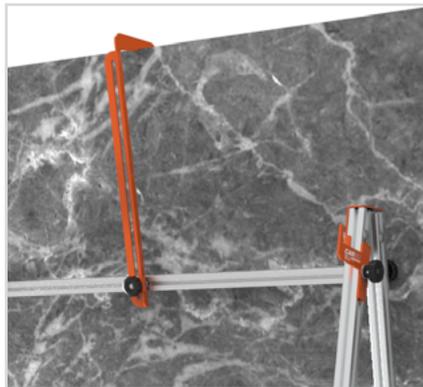

### SUPPORT WITH VIBRATION REDUCTION

It has specific wooden supports to better cushion the vibrations caused by uneven surfaces.

### PIVOTING WHEELS

It is equipped with 4 swivel wheels with brakes, to allow easy movement of large format slabs.

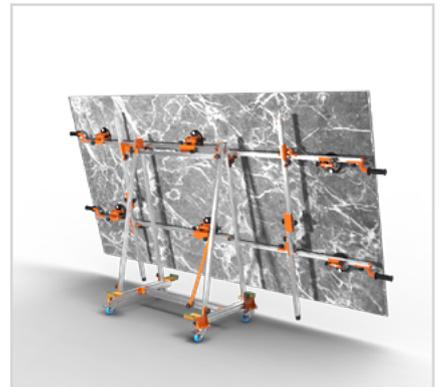

### SAFETY HOOK

Cargo allows you to move one or more slabs using the safety hook to avoid accidental unhooking.

### EASY TO TRANSPORT

Cargo can be easily reduced for easy transportation.

### COMPATIBLE WITH OTHER PRODUCTS

The design of Cargo allows it to be easily used in relation to other paving systems (Agile or Compact family).
